Hi Barbara,

I have completed the edits to the URT cancer epi section (attached).

The file is the whole 'a' file that I downloaded a while back. The changes are tracked in case anyone want to see what was changed.

I will leave this in your capable hands to incorporate into the master file.

I will revised the Appendix materials on the non-cancer exposure-response next and want to share that small piece with the economists to get any feedback from them that might improve its utility for them. Then I will make the edits for the LHP section.

Tom
